

GMDN TERM DEVELOPMENT & RESULT

APPLICATION

Date of Application: 10/06/2011 13:44:15
Name of proposal: Ms. Alicja Ostrowska
Address: 2, Zurawiec, Chrzanów, 32-500, Poland
Country: Poland

Proposed Term: Wkladki Biotermiczne (Bio-Thermal Inserts)

RESULTING TERM

New GMDN Term: Heat-reflective insole

GMDN Code: 58243

Type of Term: P

Definition: A device intended to be worn against the feet to help warm the body of a patient who has impaired thermoregulation and blood circulation. It has heat-reflecting properties intended to provide a long-term, low-intensity thermal stimulus to improve peripheral microcirculation by causing dilation of blood vessels (i.e., arterioles, capillaries, and superficial veins). The insole is placed inside selected loose-fitting footwear; it may be used to treat patients with disorders such as diabetes or atherosclerotic peripheral vascular disease. This is a reusable device.
